

TOOTHLESS DRAGON UPDATE

QUALITY ISSUE

The quality of each and every furry friend from Build-A-Bear Workshop is important to us. We recently discovered that a select number of the updated version of our Toothless furry friend sold between **January 11, 2019 and January 31, 2019** do not meet our quality standards. In some cases, the white inner lining has become visible through the black skin, and, in some cases, white stuffing is visible at a seam.

Because quality is a priority for us, we request that Guests, who purchased this particular Toothless furry friend between **January 11, 2019 and January 31, 2019** with tracking label numbers shown below, bring it into a Build-A-Bear Workshop store to exchange it for a replacement Toothless furry friend. It's important to note:

- Only the Toothless furry friends sold between **January 11, 2019 and January 31, 2019** with one of the tracking labels shown below sewn onto the side are affected.

- Current furry friends in this collection — including Light Fury, Toothless and Special Edition Hidden World Toothless — sold online or in stores after January 31, 2019, are not affected by this quality issue. Likewise, Toothless furry friends sold before January 11, 2019 are unaffected.
